

## FCBED 65 Series

### Double Waterproofing Drain

- FCBED 6524 - 24" Complete Kit
- FCBED 6532 - 32" Complete Kit
- FCBED 6536 - 36" Complete Kit
- FCBED 6542 - 42" Complete Kit
- FCBED 6548 - 48" Complete Kit
- FCBED 6560 - 60" Complete Kit

#### Features

- 16 gauge, 304L stainless steel grate and channel
- Pre - pitched channel
- Grate can be removed for cleaning
- NOT Site Sizable®
- Flanged Channel with centered threaded outlet
- Compatible with double waterproofing
  - Primary waterproofing: PVC Liner, Rubber Liner, Hot Mop, Copper Pan, Lead Pan, or Fiberglass
  - Secondary waterproofing: liquid applied or fabric sheet membrane
- Flow rate - 9 gpm per outlet
  - Flow rate measured at outlet only. Measurement does not account for water in channel or sheeting on shower floor.
  - Additional outlets can be added and combined into a larger waste line to increase flow rates

#### Installation

#### Care & Maintenance

FCBED 65 stainless steel linear drains are made of 304L stainless steel. This material is non-porous, hygienic, rust-free and extremely durable. Bar Keepers Friend® and Soft Scrub® are commonly available products that can be used to protect and clean your Satin Stainless drain cover. For stains that have been left for an excessive amount of time, stronger cleaning agents such as Steel Brite® may be needed. For Polished Stainless and other finishes we recommend a mild soap and a soft cloth for cleaning. DO NOT use any abrasive cleaners, scrub pads or allow household cleaning agents, such as bleach, to sit on the drain cover for a long period of time. Stainless steel does not rust. External factors, such as contamination from other highly ferrous metals, built up road salt, sea salt, or chlorine may have caused "surface" rust which can be removed using Barkeepers Friend®, Soft Scrub®, or Steel Brite®. Always follow the directions on the bottle. Follow proper maintenance procedures to prevent excessive surface rust. In areas of frequent exposure to salt, chlorine, and other chemical compounds, maintenance of the stainless grates should be performed at least 2-3 times per year.
