

FTC (Side Outlet) Standard Custom Form

FT (Side outlet) linear drains are designed for use with liquid applied (cold fluid applied) or fabric sheet membranes. The overall inside length of channel (A) is the finished length of the drain, with a 1 1/16" flange on all four sides to accept the waterproofing membrane. All outlet locations (B) are measured from the right inside channel edge. For this type of installation a mortar bed or equal is created up to and around the drain with the appropriate slope towards the drain. The waterproofing is applied over the mortar bed and the flange of the channel. Tile or stone is applied directly to the waterproofing for a low profile installation.

Specialty channel options are available.

- **OCS** for Schutler®-KERDI Waterproofing - KERDI membrane factory applied to the side outlet channel. Uses a 2" No-Hub Outlet.
- **OCH** for Threaded Connection - This channel is provided with a 2" male tapered thread (MPT) for direct threaded connection to a female threaded pipe.

A: Overall Inside Length	B1: Outlet Location 1	B2: Outlet Location 2	B3: Outlet Location 3	C: Outlet Length
