

Stainless Steel Shower Base

Custom Form

BL One piece stainless steel shower base with integral drain designed for use with liquid applied (cold fluid applied) waterproofing. The overall outside width (A) and depth (B) is the frame-to-frame dimensions. The finished length (the inside length) of the drain channel is dependent on the backerboard and tile thickness. The outlet location (C) is measured from the framing to the center of the drain pipe. The shower base can be set in place before or after the framing and connected to the wasteline. The backerboard is then installed and the waterproofing is applied. Tile or stone is applied directly to the shower base using thinset.

Location: **Choose (1)**
