S-LTAS 38 Stainless Steel Site Sizable Series

- S-LTAS 3840 - 40" Complete Kit
- S-LTAS 3848 - 48" Complete Kit
- S-LTAS 3860 - 60" Complete Kit
- S-LTAS 3880 - 80" Complete Kit
- S-LTAS 3896 - 96" Complete Kit

Features

- 16 gauge, 304L stainless steel grate
- Modify length and outlet location on site
- Indoor or outdoor use
- Stainless steel channel
- Works with 2" clamp down floor with 2" throat/strainer size *(not included)*
- NOT INTENDED for installation across a barrier-free threshold
- Compatible with: PVC Liner, Rubber Liner (Chloraloy®), Hot Mop, Lead Pan, Copper Pan, or Fiberglass
- Flow rate - 9 gpm per outlet
 - Flow rate measured at outlet only. Measurement does not account for water in channel or sheeting on shower floor.
 - Additional outlets can be added and combined into a larger waste line to increase flow rates

Installation

S Site Sizable PVC Channel

Care & Maintenance

S-LTAS 38 stainless steel linear drain top grates are made of 304L stainless steel. This material is non-porous, hygienic, rust-free and extremely durable. Bar Keepers Friend® and Soft Scrub® are commonly available products that can be used to protect and clean your Satin Stainless drain cover. For stains that have been left for an excessive amount of time, stronger cleaning agents such as Compound 302® may be needed. For all finishes we recommend using mild soap and a soft cloth for cleaning. **DO NOT** use any abrasive cleaners, scrub pads or allow household cleaning agents, such as bleach, to sit on the drain cover for a long period of time. Stainless steel does not rust. External factors, such as contamination from other highly ferrous metals, built up road salt, sea salt, or chlorine may have caused "surface" rust which can be removed using Barkeepers Friend®, Soft Scrub®, or Steel Brite Cleaner. Always follow the directions on the bottle. Follow proper maintenance procedures to prevent excessive surface rust. In areas of frequent exposure to salt, chlorine, and other chemical compounds, maintenance of the stainless grates should be performed at least 2-3 times per year.
